SUMMARY

Data engineer with 5 years of experience in data analysis and data engineering, and a master's in Industrial and Organizational Psychology. Led data warehouse design, an in-house event-tracking tool, an Airflow migration to Kubernetes, a data analysis white paper, and an internal data portal at BenQ. Values evidence-driven analysis, empathy when a team changes how it works, and putting data in users' hands.

SKILLS

Languages: Python, SQL
Data engineering: Airflow, PySpark, Kafka, Hadoop, Hive
Warehouse / platform: Databricks, BigQuery, OpenSearch/ELK, MySQL
Data governance: DataHub, data modeling, documentation, ownership practices
Cloud: AWS (S3, SQS, Athena, QuickSight), GCP
Infrastructure / monitoring: Kubernetes, Docker, Linux, Prometheus, Grafana
Other: API platform development, Tableau

EXPERIENCE

Senior Data Engineer | BenQ — May 2024 – Present

- Built **Momotaro**, an in-house event-tracking tool that replaced a legacy Matomo setup on EC2 without requiring app changes (Python, Flask, microservices, AWS).
- Migrated Airflow from the Celery executor to the Kubernetes executor; rebuilt monitoring (Prometheus + Grafana) and backups.
- Designed the data warehouse layers and team documentation standards; started a project Owner system and a weekly study group.
- Built a data analysis white paper using Databricks Genie (Text-to-SQL) and an internal Insight Portal.
- Developed a shared API platform for the team and a Data QA automation tool (Appium) that reduces analysts' manual work.

Data Engineer | Pixl Solutions — Aug 2023 – Apr 2024

- Managed and optimized data warehouses on AWS and GCP; operated ELK services.
- Supported cross-department data requests and analysis.

Part-time Teaching Assistant | Alpha Camp (career break) — Apr 2023 – Jul 2023

- Supported live sessions, reviewed assignments, and answered questions for SQL and data courses.

Data Engineer | KKStream — Aug 2022 – Apr 2023

- Built internal data frameworks and AWS integrations.
- Refactored a performance-reporting module; designed metrics and dashboards.

Data Engineer | Gamania — Jun 2021 – Aug 2022

- Maintained and built ETL pipelines; designed a marketing-ad data warehouse.
- Led a data dictionary project with DataHub; built monitoring dashboards in Grafana.

Smart Education Administrator | National Yunlin University of Science and Technology — Mar 2019 – May 2021

- Developed a neural network model for learning-behavior recommendations.
- Built crawlers, notification programs and a LINE bot; ran learning-behavior research.

Earlier: Data Analyst Intern, KKday (Aug 2017 – Jun 2018): daily price-comparison reporting system and crawler. Data Analyst Assistant, Hongguang Data (Jul – Aug 2017): R web crawlers and data cleaning.

SELECTED PROJECTS

Stark Support Bot | LLM guardrails and evaluation (personal project) Oct 2026

- Started from a defenseless RAG bot, added one defense at a time, and re-ran the same 28 attacks and 6 normal questions after each step: attacks blocked rose from 16/28 to 28/28 while all normal questions stayed answerable.
- Evaluation method: deterministic checks, confidence intervals on small samples, and documented limits. Python, FastAPI, MLflow.

agent-perch: supervisor for long-running AI agents | open source (MIT) Oct 2026

- Single-file, standard-library-only Python tool that restarts dead agent sessions, unsticks keypress prompts, and gives agents a mailbox; every design decision documents its trade-off.

YouBike Historical Data | personal project 2025

- Collects Taipei YouBike availability every ten minutes into a fact table and a station dimension table, with a documented schema and known data pitfalls.

EDUCATION

M.A., Industrial and Organizational Psychology, National Chengchi University (Sep 2016 – Mar 2019)
B.A., Psychology, National Chung Cheng University (Sep 2012 – Jun 2016)

CERTIFICATIONS

Databricks Certified Data Engineer Associate (May 2026) | AWS Certified Data Engineer – Associate (Feb 2024) | Google Cloud Associate Cloud Engineer (Apr 2023)
